Eastern Young Cattle Indicator (EYCI)

The Eastern Young Cattle Indicator, or EYCI, is a seven-day rolling average of 24 young cattle categories from 24 saleyards across Queensland, New South Wales and Victoria. It is expressed in cents per kilogram carcass (or dressed) weight (¢/kg cwt) and is rounded to the nearest ¼ cent.

The EYCI is designed to be applicable to a wide range of cattle and beef industry participants, and has sufficient diversity (both geographic and cattle type) to prevent manipulation by activity in the physical cattle market.

The young cattle market was chosen as the base for the EYCI as it is the largest, most transparent of the physical cattle markets and attracts the widest range of industry participants.

What is a seven-day rolling average?

At any point in time, a seven-day rolling average includes data from the past seven days. In the case of the EYCI, this refers to seven calendar days, or one week.

The EYCI includes vealer and yearling heifers and steers, grade score C2 or C3, with liveweight from 200kg (See table below). The EYCI currently includes cattle purchased for restocking, lot feeding and slaughter from the relevant prime sales.

Individual states were integrated into the EYCI at the commencement of NLRS reporting in that state:

NSW – August 1996

Victoria – May 1997

Queensland – October 1999

Cattle categories in the EYCI

Classification	Muscle/fat	Liveweight (kg)
Vealer steers	C2 & C3	200.1-280
		280.1-330
Vealer heifers	C2 & C3	200.1-280
		280.1-330
Yearling steers	C2 & C3	200.1-330
		330.1-400
Yearling heifers	C2 & C3	200.1-330
		330.1-400

Category specifications

The following tables show the grades that are used for the Meat & Livestock Weekly Statistics.

Cattle indicator weights
